Brainstorming and Ideation Phase

Brainstorm and idea prioritization template

Date	*28-09-2026*
Team ID	*SWTID-2026-8399*
Project title	*Implement client script and ui policy(incident)*

The Ideation Phase is the foundation of any ServiceNow implementation project. Before writing any code or configuration, this phase is dedicated to understanding the business problem and generating the right solution approach.

TEMPLATE 1: BRAINSTORMING PHASE TEMPLATE

Field	***Project Data***
Problem Statement	*Incident records have incomplete/incorrect data, affecting SLA and reporting. Need to enforce conditional field behavior at UI level.*

How Might We...?	*HMW ensure High Impact incidents are always assigned? HMW prevent users from changing Urgency when Impact is High?*
StaKeholders	*Service DesK Agent, Incident Manager, Admin*

Brainstorming

1. *The brainstorming focuses on improving* ***Incident data quality and consistency*** *in ServiceNow.*
2. *It explores using* ***UI Policies*** *to dynamically maKe fields mandatory and control field behavior.*
3. ***Client Scripts*** *can automate values such as setting Urgency to High when Impact is High.*
4. *Validation can prevent Incident submission when required information, such as Assigned To, is missing.*
5. *The brainstorming also considers preventing unauthorized State changes through list editing while allowing valid form-based updates.*

TEMPLATE 2: IDEA PRIORITIZATION TEMPLATE

Idea ID	Idea (From Brainstorming)	Business Impact (1-5)
I-01	Assignment Group Mandatory when Impact=High	5
I-02	Urgency Read-only when Impact=High	4
I-03	Auto-set Urgency=High	5
I-04	Block save if Assigned To empty	4
I-05	Block State change from list	3
I-06	Close Notes mandatory	3

I:A

ServiceNow Incident Form

Workflow

Require Assignment Fields

Make the agreed assignment fields mandatory.

Relax Assignment Requirement

Make assignment fields optional (or revert to the standard policy).

Restore Urgency Policy

Allow the standard Urgency settings (not forced to High).

Set Urgency to High

Automatically set Urgency to High

Skip Extra Validation

Do not enforce additional required information beyond the standard rules.

Validate Required Information

Check that all required information is provided before

List Edit Blocked

Prevent list edits while the form is in this state

Form Update Allowed

Permit edits and save the form normally

Enforce policy for high-impact incidents

Keep the process simple for other incidents

Improve data quality and consistency

Support faster resolution
